PROFESSIONAL SUMMARY

Master of IT student and hands-on developer who builds software, APIs and AI-powered applications, and turns business requirements into working solutions. Experienced across the full stack (JavaScript, Python, REST APIs, SQL) with a track record of shipping real products through industry projects, internships and hackathons. Comfortable working directly with stakeholders to gather requirements, integrate systems and automate manual processes.

TECHNICAL SKILLS

Languages & Development: JavaScript, Python, SQL, HTML, CSS, React, React Native, Next.js, FastAPI

APIs & Integrations: REST API design and consumption, third-party service integration, connecting frontend, backend and AI services

Automation & AI: GenAI integration, AI use-case evaluation, Google Vision API, workflow automation of manual/paper-based processes

Cloud & Tools: AWS, Git, Vercel, Jira, Microsoft 365

Business & Solution Analysis: Requirements gathering, process mapping, stakeholder engagement, user journey mapping

WORK EXPERIENCE

AI App Developer Intern — Pixelz360 *2026 – Present*

- Build and prototype internal software using AI-assisted development tools, translating business needs into working digital solutions and adding AI-enabled functionality where it delivers value.
- Partner with the business to understand internal software requirements and convert them into clear, buildable specifications for customised tools.
- Research commercially available products as reference points, identifying features that can be adapted to the company's workflows and business systems.

Software Engineer Intern — QLD Government, Dept. of Environment, Tourism, Science and Innovation *2026 – Present*

- Led development of a functional React Native (Expo) wildlife-recognition app for iOS and Android, built for Indigenous Junior Rangers, with three custom Vertex AI image models recognising 18 local species.
- Integrated frontend, backend, REST APIs and AI services into a single working product, delivering camera-based missions, AI wildlife recognition, species information and text-to-speech.
- Ran regular client meetings to gather requirements and validate direction, translating complex technical detail into clear, accessible language for non-technical stakeholders.

PROJECT EXPERIENCE

Junior Ranger — AI-Powered Wildlife Learning App *(Industry, 2026)*

AI-powered mobile app helping Indigenous children in remote Queensland communities learn about local wildlife through interactive photo-based activities, improving environmental awareness, English vocabulary and digital literacy via a game-based experience.

Thai Me Up — Full-Stack Food Delivery Platform *(Academic, 2025)*

Built a full-stack ordering platform with an admin mode for restaurant owners to manage menu items and a customer-facing online ordering flow — reducing reliance on third-party delivery apps and commission costs by automating the ordering process.

SafeMind — GenAI OHS Incident Reporting System *(Hackathon, 2025)*

Developed a GenAI-powered incident-reporting prototype that lets injured workers capture evidence via voice-to-text and photo uploads, automatically generating structured workplace-injury forms and streamlining submission — removing manual reporting steps.

Vcinity — Student Community App *(Academic, 2025)*

Designed and prototyped a student community app centralising career, wellbeing, social and academic support, improving onboarding and campus-resource discovery with positive user feedback on usability.

EDUCATION

Master of Information Technology — Queensland University of Technology (2025 – graduating end 2026)

Tricontinental Master in Global Studies — Karlsruhe University of Applied Sciences & Universidad de Monterrey (2018 – 2020)

Bachelor of Law — National Chung Hsing University (2014 – 2018)

COMMUNITY & EXTRACURRICULAR

Member, QLD Emerging Professionals Committee (EPC) — Australian Computer Society (ACS) *2026 – Present*

- Connect students and early-career professionals with Queensland's tech community through industry events; support speaker coordination and event planning.

Graphic Designer — QUT Code Network *2025 – 2026*

- Create branded visual content and event materials for a student tech community, supporting clearer communication across social media and student-facing channels.

REFEREES

Clara Villa — Backend Engineer, Convert Digital

Dr Pamela Hoyte — Associate Lecturer, Queensland University of Technology

Detailed referee contact details available on request.
